

## Punctual Transport Monitoring

**TripOnTime®** monitors automotive transport services, with the tracking of every bus and record of every stop along each route, linked to the Telematics Device and transferring the information in real time.

The **TripOnTime® mobile app** provides real-time visualization of the vehicle on route, providing certainty and punctuality to service users, avoiding loss of passenger service and shortening waiting times at bus stops.

## Precise passenger and transport tracking for punctual arrivals and departures

Fully integrated with the **Monitoring Platform**, so that all transport logistics traceability is georeferenced and notified in real time

Record and monitor the passenger transport services operation, providing certainty and control of departures, stops and arrivals, with real-time notifications for service transport users

- Route Logistics
- Driver Logistics
- Travel Configuration
- Route Map
- Synoptic Tracking Map
- Compliance Log

## Benefits

**TripOnTime®** helps to reinforce punctuality and satisfaction in the personnel and passengers transport services.

Shorter waiting periods at stops

Punctuality in arrivals and departures

Bus stops record on each route

Assigned driver identification

Fully compatible with **myGEOTAB** ecosystem
